DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-8, 10, 11 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ratzel (US 5,138,261).

As regards to claim 1 and 10, Ratzel teaches an apparatus and method to correct field strength produced by radio frequency pulses, which are emitted by an antenna in a magnetic resonance examination conducted in a magnetic resonance apparatus (figure 1), including a power supply connected to and to cause current to flow in the antenna to emit a radio frequency pulse having a field strength (figure 1, numerals 13-16; column 2, lines 25-31, 48-69), and means to regulate current in the antenna to regulate the field strength by changing said power by a predetermined nominal value (figures 1-3, numerals 13-16; column 2, lines 25-31, 48-69, column 3, lines 10-40, column 4-5, lines 20-67 and 1-28, column 8, lines 13-40).

As regards to claims 2-5, Ratzel further teaches power regulation by changing power applied to change amplitude and phase of the current (figures 1-3, numerals 15,16,22, 23).

As regards to claims 6-8, 11 and 15, Ratzel further teaches two field probes to regulate current flow in the antenna to change current amplitude and phase at various angles (figures 1-3, numerals 17 and 17')

Allowable Subject Matter

2. Claims 9, 12-14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brij B Shrivastav whose telephone number is 571-272-2250. The examiner can normally be reached on 7 AM to 4 PM.
